Detailed Action

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 1-5,11 and 21-24** are rejected under 35 U.S.C. 102(b) as being anticipated by Wada.

The examiner would specifically like to point out the similarities between applicant's figures 8a and 8b and Wada's figure 2.

Regarding claims 1,2 and 21-24 Wada discloses (see fig.2) an A/D converter comprising a self-oscillating loop modulator having at least one self-oscillating loop including a forward path (A11, D12), a feedback path (A14), wherein the forward path comprises amplitude quantizing means (11 and 12) combined with time quantizing means (clocked flip-flop,13) and outputting at least one time and amplitude quantized signal (D13).

Regarding claims 3,4 and 5 Wada recites that the time quantizing means ("latched" flip-flop circuit) may be used for "high speed sampling" (col. 2,lns.56-57) and shows a single bit output (D13, fig. 2).

Regarding claim 11 Wada shows (fig.2) that the A/D converter is "single ended" (i.e. one output).

3. **Claims 6-10 and 12-20** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Greenwood et al and Noujaim disclose ADC's having feedback and latched outputs.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Young whose telephone number is 571-272-1816. The examiner can normally be reached on Mon-Fri 7:30-4:00.
